

Heuristic Evaluation - Website Usability Testing Guide

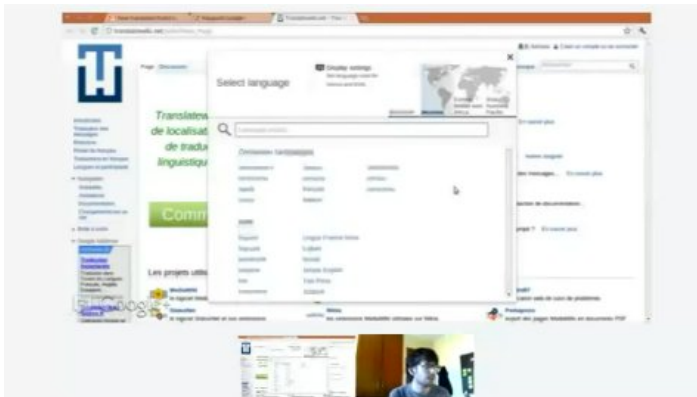

Heuristic Evaluation

Scenario: You want to compare your website's interface against a set of widely accepted principles with a few people to assist.

What/Why: Heuristic evaluation involves a small set of evaluators examining an interface and judging its compliance with usability principles or "heuristics". Use a heuristic evaluation form to help you identify key problems (form attached).

According to Nielsen, just 5 evaluators can detect 85% of errors with this method!

Types of Questions/Prompts:

- Create realistic tasks users can accomplish on your website
- Use the attached heuristic evaluation form to document each tester's experience.
