10 Tips for Web Accessibility

LSNTAP talks you through how to ensure your organization's website is accessible and is utilizing current, up to date methods for use by people with fine motor control issues and for people who are hearing or vision impaired.

Learn about the following subjects:

- keyboard focus accesability
- text contrast issues
- Accessibility for Individuals with Color Blindness
- ARIA labels
- ALT text
- How to write content
- Subtitles for Videos
