Security and Confidentiality for Providing Legal Services Remotely

This intro level security class is focused specifically on remote working and protecting your client's confidentiality and your organization's security. Since we have all moved online, hackers and scammers are targeting this new set of remote workers.

In this webinar you'll learn about:

- **Common scams**
- **VPN and other private remote networks**
- **How to respond to a data breach**
- **Password management**
- **Encryption options**

Bring Your Questions, there will be time for Q&A, with experts
