## **8. Security Toolkit: 2021 Security Webinar Series**

Security is important to our organizations and to our clients. The security of our organizations is not the job of one person; it's on all of us. We all have an ongoing responsibility to ensure we are operating in a secure environment to protect client data and confidential organizational data. Legal aid organizations need to continue to learn more about the latest security recommendations, improve the security of their technology, and its management, as well as help users navigate technology more securely. Together we can work to enhance security in the legal aid community.
