Legal Services of Greater Miami - Technical Solutions Designer

The Technical Solutions Designer is responsible for developing and implementing the systems and technology solutions that meet program needs, increase efficiency, and improve effectiveness. The Technical Solutions Designer is also responsible in gathering requirements and functional specifications, assessing the current systems in place to identify areas in need of improvement, and implementing approved technical solutions. This is a full-time position. All duties are performed under the direct supervision of Chief Information Officer.

Full job description can be found [here](#).
